Returns

Best prices

Nearest stores

Verified sellers

“I need a wedding caterer.”

Returns

Top-rated caterers

Photos

Reviews

Distance

CHAPTER 18

AI Business Assistant

Business owners get AI too.

AI helps:

Write product descriptions

Improve business profile

Suggest hashtags

Generate adverts

Suggest prices (based on market information where available)

Recommend posting times

Business analytics summary

CHAPTER 19

AI Safety

AI should:

Never guarantee a seller.

Never promise quality.

Recommend based on available information such as listings, ratings, and verification.

Warn users to verify important details before making purchases.

CHAPTER 20

Verification

Business submits

Business Name

Phone

Address

Government-issued ID (where required)

Regular Backups

CHAPTER 23

Future Features

ShopNear Delivery

ShopNear Pay

Business Ads

Business Analytics Pro

AI Voice Assistant

AI Translation

Booking System

Escrow Payments

Public API

QR Code Business Cards

FINAL DECLARATION

This Functional Specification defines the expected behavior, workflows, and user experience for ShopNear Version 1.0. It is the primary guide for designers, developers, testers, and future contributors.

Any new feature or major change should be documented before implementation to maintain consistency and quality across the platform.
